## EDUCATION

### Electrical and Computer Engineering, The University of Texas at Austin

Sep.2019 – May.2021

- Master of Science in Electrical and Computer Engineering, tracked in Software Engineering

### Honors College, Beihang University, China

Sep. 2015 – Jul. 2019

- Bachelor in Pattern Recognition and Machine Learning
- Overall GPA: 90.9/100 (3.86/4.0) Major GPA: 93.4/100 (3.96/4.0)

Core Courses: Digital Image Processing (100), Information Retrieval (95), Pattern Recognition and Machine Learning (94)

### Department of Computer Science and Operations Research, University of Montreal, Canada

Sep. 2018 – Jan. 2019

- University of Montreal Undergraduate Research Program (2 selected from 213), supervised by professor Jian-Yun Nie

### School of Applied Science and Engineering, University of Toronto, Canada

Sep. 2017 – Dec 2017

- Exchange student major in Electrical & Computer Engineering
- Overall GPA: 4.0/4.0

Core Courses: Data Structure and Algorithm (A+), Programming Language (A), Dynamic Systems and Control (A+)

## RESEARCH EXPERIENCES

### Online Reweighting Neural Framework for Relation Classification from Noisy Data | Research Assistant Oct. 2018 – Feb. 2019

Advisor: Jian-Yun Nie, Professor, Department of Computer Science and Operations Research, University of Montreal

- Proposed a novel robust neural framework to directly learn from noisy data for sentence-level relation extraction
- An online meta-learning algorithm is applied to learn the weights of instances in a mini-batch, to denoise the training set

### Integrated Learning of Features and Ranking Function in Information Retrieval | Research Assistant Sep. 2018 – Jan. 2019

Advisor: Jian-Yun Nie, Professor, Department of Computer Science and Operations Research, University of Montreal

- Proposed an integrated end-to-end learning framework based on learning-to-rank to learn both neural features and the ranking function simultaneously.
- The framework has the flexibility to integrate arbitrary traditional features

### Intelligent Vehicle Project | Research Assistant

May 2018 – Sep. 2018

Advisor: Hui-Jing Zhao, Professor, School of Electronics Engineering and Computer Science, Peking University

- Built convolutional neural networks to classify different kinds of road intersections based on 3D-LIDAR data
- Applied the model (97% precision) in building a global map and driving assistant

### Dental Haptic Device | Research Assistant

Dec. 2017 – Mar. 2018

Advisor: Yu-Ru Zhang, Professor, Robotics Institution of Beihang University

- Investigated co-actuation module to achieve high stiffness and low inertia for haptic devices
- Designed the control algorithm of the haptic device for numerical simulation

### Search Engine Development | Research Assistant

Sep. 2017 – Dec. 2017

Advisor: Jian-Wen Zhu, Associate Professor at Department of Electrical & Computer Engineering, University of Toronto

- Implemented the depth-first-order crawler code to traverse 20K web pages
- Constructed the PageRank algorithm to rank the web pages based on the click information for each web page
- Designed the front-end based on the Python Bottle web framework
- Deployed the web application, the front-end, and the backend persistent database on Amazon Elastic Compute Cloud

## PUBLICATION

- (Under-review Paper) Integrated Learning of Representation Features and Ranking Function, submitted to ICTIR 2019  
Yifan Nie, Jiyang Zhang, Jianyun Nie.

## HONORS AND AWARDS

- 1<sup>st</sup> Academic Excellence Award of Beihang University (TOP 3%) 2018
- Academic Competition Award of Beihang University (TOP 10%) 2018
- Honorable Mention Mathematical Contest in Modeling (MCM) 2018
- 3<sup>rd</sup> Academic Excellence Award of Honors College of Beihang University (TOP 15%) 2017
- 2<sup>nd</sup> Academic Excellence Award of Honors College of Beihang University (TOP 5%) 2016

➤ 2<sup>nd</sup> prize in 2016 China Undergraduate Physics Tournament, BUAA

2016

---

#### PROFESSIONAL EXPERIENCE

INFIMIND AI Technology Company

Beijing, China

AI Algorithm Department

May 2019 – Jul 2019

➤ Design algorithm to generating advertisement based on information retrieval algorithm

---

#### LEADERSHIP AND ACTIVITIES

Led the team and won the Bronze Medal in 2016 and the Silver Medal in 2018 for the BUAA League Volleyball Match

---

#### ➤ SKILLS

Language skills: English: TOEFL scores 111 (Reading: 30 Listening: 28 Speaking: 24 Writing: 29); Chinese: fluent

➤ Programing skills: Python, C++, MATLAB
